

Day Care FSA

Guiding employees to simple and effective tax savings

Flexible Spending Account

Flexible Spending Accounts (FSAs) help employees save up to 40% on health and dependent care expenses. For employees enrolled in traditional health plans, health care FSAs are used to pay for prescription drugs, co-pays, deductibles, and other out-of-pocket costs. Employees enrolled in qualified HDHPs can use limited-purpose FSAs for vision and dental expenses, thereby maximizing their HSA savings. And dependent care FSAs are great options to save and pay for child care.

Common challenges

FSAs are a valuable employee benefit, yet changing regulations and technologies make FSAs complex to manage. Common challenges we hear include:

- Slow "no tech" claim reimbursement
- Payment card only works with the FSA
- No coordination with other health benefits
- Confusing or inflexible options for handling year-end run-out and carry-over balances
- FSA is tightly coupled to one health plan; doesn't work well with other plans or for retail purchases
- Cumbersome administration
- "Pass the buck" customer service responses

- Recurring claims processing

The collage displays various Navia benefit communications. It includes email templates with subject lines like "Sign up for an education webinar!", "Don't miss out on your benefit savings!", and "Don't overpay for healthcare next year!". There are also social media-style posts for "Live Webinars" and a "Bottom Line" summary stating that a tax-advantaged FSA can save an average of 30% on every expense. A "Bottom Line" section also reminds users to enroll during their open enrollment period. At the bottom, there's a promotion for a Navia raffle prize by entering information and checking out the Navia Benefits Academy. Each communication features the Navia logo and a call to action.
